
Typification and validation of some names in *Synuopsis* J.Schiller, 1929 (*Chromulinaceae, Chrysophyceae*)

Daniel E. Wujek, *Biology Department, Central Michigan University, Mount Pleasant, Michigan 48859, USA* (correspondence: wujek1de@cmich.edu)

Michael D. Guiry, *AlgaeBase, Ryan Institute, National University of Ireland, Galway H91 TK33, Ireland*

The genus name *Synuopsis* J.Schiller was introduced by Schiller (1929: 443) for two new freshwater chrysophycean species, *S. danubensis* J.Schiller and *S. globosa* J.Schiller, without specifying a type. While *Synuopsis danubiensis* J.Schiller was named by Wujek & Thompson (2001: 88) as type, it was not formally designated as required after 1 January 2001 by ICN Art. 7.11 (Turland *et al.* 2018). Additionally, a number of new combinations made by Wujek & Thompson (2001: 88) were nomenclaturally invalid as “a full and direct reference given to its author and place of valid publication, with page or plate reference and date” (ICN Art. 41.5) was not provided. We here rectify these nomenclatural issues.

Synuopsis J.Schiller, *Archiv für Protistenkunde* Vol. 66, p. 443, 1929.

Lectotype (here designated): *Synuopsis danubensis* J.Schiller, 1929.

Note: prior to 1 January 1958, a name may be validly published without indicating a type (ICN Art. 40.1), so the original name was not invalid.

Synuopsis elaeochrus (F.W.Jane) Wujek & R.H.Thompson, *comb. nov.*

Basionym: *Synochromonas elaeochrus* F.W.Jane, *Proceedings of the Linnean Society of London*, Vol. 152, p. 307, fig. 3, 1940.

Note: “*Syncrypta elaeochrus* Bourrelly” *nom. inval.* (Bourrelly 1957: 149), supposedly based on *Synochro-monas elaeochrus* F.W.Jane, is invalid as it also does not meet the requirements of ICN Art. 41.5.

Synuopsis gracilis (Korshikov) Wujek & R.H.Thompson, *comb. nov.*

Basionym: *Synochromonas gracilis* Korshikov, *Archiv für Protistenkunde* Vol. 95, p. 30, fig. 6, 1941.

Note: “*Uroglena gracilis* Bourrelly” *nom. inval.* (Bourrelly 1957: 153), supposedly based on *Synochromonas gracilis* Korshikov, is invalid as it does not meet the requirements of ICN Art. 41.5.

Synuopsis janei (Bourrelly) Wujek & R.H.Thompson, *comb. nov.*

Basionym: *Syncrypta janei* Bourrelly *Revue Algologique: Mémoire Hors-Série* Vol. 1: p. 149, fig. J 16 [p. 59]; pl. I: figs. 23, 24, 1957.

Note: While the original description of *Syncrypta janei* Bourrelly is only in French, for algae, Latin was a requirement only from 1 January 1958 through to 31 December 2011 (ICN Art. 44.1).

Synuopsis pallida (Korshikov) Wujek & R.H.Thompson, *comb. nov.*

Basionym: *Synochromonas pallida* Korshikov, *Archiv für Protistenkunde* 67, p. 273, pl. 9: figs 9-12; pl. 10: fig. 24, 1929

Note: “*Syncrypta pallida* Bourrelly” (Bourrelly 1957: 149), supposedly based on *Synochromonas pallida* Korshikov, is invalid as it does not meet the requirements of ICN Art. 41.5.

Synuopsis perlata (Skuja) Wujek & R.H.Thompson, *comb. nov.*

Basionym: *Synochromonas perlata* Skuja, *Nova Acta Regiae Societatis Scientiarum Upsaliensis, Series IV* 16(3): 285, pl. XLIX [49]: figs 5-8, 1956

Note: “*Syncrypta perlata* Bourrelly” *nom. inval.* (Bourrelly 1957: 149), supposedly based on *Synochromonas perlata* Skuja, is invalid as it does not meet the requirements of ICN Art. 41.5.
